Subject Index of Volume 180

Absorption spectra
  absorption spectra of solid rare earth complexes obtained from the inner filter effect on luminescence, 229
  the electronic structure of organometallic complexes of the f elements XVIII: Interpretation of the optical and magnetochemical data of a cyclohexylisocyanide adduct derived from Tris(η^5-cyclopentadienyl)samarium(III), 337
Acetylacetones
  rare earth(III) complexes with indole-derived acetylacetones. II. Luminescent intensity for europium(III) and terbium(III) complexes, 399
  Rare earth(III) complexes with indole-derived acetylacetones III: Quenching of terbium(III) luminescence in Tb–L (or A)–phenol by phenol, 403
  Rare earths(III) complexes with indole-derived acetylacetones. I: synthesis and characterization of rare earth(III) complexes, 391
Actinides
  hydration of lanthanides and actinides in solution, 325
  new developments in actinide alkoxide chemistry, 303
Alkoxides
  new developments in actinide alkoxide chemistry, 303
Amercium
  luminescence of Eu^{3+} ($4f^6$) and Am^{3+} ($5f_6$) in thorium oxide, 193
Apatites
  recovery of rare earth elements from phosphorites in the USSR, 71
Atomic shell
  Quark-like structures in the atomic f shell, 105

Batteries
  rechargeable hydrogen batteries using rare-earth-based hydrogen storage alloys, 37

Biochemistry
  concentrations of rare earth elements in human brain tissue and kidney stones determined by neutron activation analysis, 63
Biomides
  mean molal activity coefficients of aqueous scandium chloride, nitrate, bromide and perchlorate solutions at 25.0 °C, 383
Borates
  luminescence and crystal field calculation of aragonite-type $LaBO_3:Eu^{3+}$, 223

Cadmium
  ^{113}Cd nuclear magnetic resonance study of the binding of Cd^{2+} and Lu^{3+} to silver hake parvalbumin, 349
Calcium
  determination of catalytic active sites in (Ce^{3+}, Ca^{2+})–supported Y zeolite by Fourier transform IR spectroscopy, 289
Calmodulin
  lanthanide inhibition of 5′-nucleotidase in the phosphodiesterase assay of calmodulin, 357
Carbon
  neutron diffraction study of $RNiC_2$ (R = Rare Earth) compounds, 251
Carboxymethoxysuccinate
  use of fluorescent probes for the investigation of solutions: the case of europium–carboxymethoxysuccinate complexes, 183
Catalysis
  catalytic behaviour and surface properties of supported lanthana, 295
  determination of catalytic active sites in (Ce^{3+}, Ca^{2+})–supported Y zeolite by Fourier transform IR spectroscopy, 289
  preparation and characterization of praseodymium oxide to be used as a catalytic support, 271

Cerium
determination of catalytic active sites in (Ce^{3+}, Ca^{2+})–supported Y zeolite by Fourier transform IR spectroscopy, 289
Chlorides
mean molal activity coefficients of aqueous scandium chloride, nitrate, bromide and perchlorate solutions at 25.0 °C, 383
Chlorine
first direct calculation of 4f→4f oscillator strengths for dipolar electric transitions in $PrCl_3$, 239
study of extraction of the $NdCl_3$–$SmCl_3$–HCl–H_2O–di-(2-ethylhexyl)-phosphoric-acid-kerosine system, 409
Corrosion
corrosion inhibition with rare earth metal salts, 15
Crystal field
effect of second neighbours on the crystal field in rare earth compounds, 243
luminescence and crystal field calculation of aragonite-type $LaBO_3:Eu^{3+}$, 223
optical properties and crystal field calculations of europium tellurium oxide, 111
recent extensions to crystal-field and transition-intensity models, 93
unexpected relations between matrix elements of the three-body scalar operators t_i in the f shell, 165
Crystal structure
the series $LnSrVO_4$: synthesis, crystal structure, crystal chemistry and magnetic susceptibilities, 281
Crystals
optical absorption and emission spectra of Tb^{3+} in hexagonal crystals of $Na_3[Tb(pyridine\text{-}2,6\text{-}dicarboxylate)_3]\cdot NaClO_4\cdot 10H_2O$, 177

Diglycolic acids
the effect of ligand rigidity on the stability of europium(III) complexes with substituted diglycolic acids, 375

EDTA salts
perturbations of the luminescence spectra of europium–EDTA salts caused by selected monovalent counterions, 201
Electric transitions
first direct calculation of 4f→4f oscillator strengths for dipolar electric transitions in $PrCl_3$, 239
Electrodeposition
study of the electrodeposition and surface metallization of yttrium, 55
Electronic structure
surface electronic structure of rare earth metals, 259
Emission spectra
optical absorption and emission spectra of Tb^{3+} in hexagonal crystals of $Na_3[Tb(pyridine\text{-}2,6\text{-}dicarboxylate)_3]\cdot NaClO_4\cdot 10H_2O$, 177
Energy level
comparative analyses of Nd^{3+} ($4f^3$) energy level structures in various crystalline hosts, 131
Europium
a high-resolution spectral study of $Li_3Eu(2,6\text{-}pyridinedicarboxylato)_3$, 141
analysis of the fluorescence of the ion Eu^{3+} in fluoroborate glasses containing silver particles, 215
europium(III) complexation with glycine, 369
fluorescence spectra of ARE_2I_5 and $AREI_3$ in the solid state (A≡K, Rb, Cs, Tl; RE≡Sm, Eu), 235
luminescence and crystal field calculation of aragonite-type $LaBO_3:Eu^{3+}$, 223
luminescence of Eu^{3+} ($4f_6$) and Am^{3+} ($5f^6$) in thorium oxide, 193
optical properties and crystal field calculations of europium tellurium oxide, 111
perturbations of the luminescence spectra of europium–EDTA salts caused by selected monovalent counterions, 201
rare earth(III) complexes with indole-derived acetylacetones. II. Luminescent intensity for europium(III) and terbium(III) complexes, 399
structural studies in lead fluorogermanate and fluorosilicate glasses, 117
the effect of ligand rigidity on the stability of europium(III) complexes with substituted diglycolic acids, 375

the sensitized fluorescence of polyethylene phthalate doped with 2-pyrazine carboxylic acid and its complexes with europium and terbium ions, 125
use of fluorescent probes for the investigation of solutions: the case of europium-carboxymethoxysuccinate complexes, 183
Extraction behaviour
study of extraction of the $NdCl_3$–$SmCl_3$–HCl–H_2O–di-(2-ethylhexyl)-phosphoric-acid-kerosine system, 409

Fluorescence
analysis of the fluorescence of the ion Eu^{3+} in fluoroborate glasses containing silver particles, 215
fluorescence spectra of ARE_2I_5 and $AREI_3$ in the solid state (A≡K, Rb, Cs, TI; RE≡Sm, Eu), 235
laser-induced fluorescence studies of terbium triscyclopentadienide, 157
the sensitized fluorescence of polyethylene phthalate doped with 2-pyrazine carboxylic acid and its complexes with europium and terbium ions, 125
use of fluorescent probes for the investigation of solutions: the case of europium-carboxymethoxysuccinate complexes, 183
Fluoride
rare-earth doped fluoride glass fibres, 27
Fluoroborate
analysis of the fluorescence of the ion Eu^{3+} in fluoroborate glasses containing silver particles, 215

Gadolinium
gadolinium chelates as relaxation agents in magnetic resonance imaging, 317
surface electronic structure of rare earth metals, 259
Germanium
chiroptical activity of holmium pyrogermanate: tetragonal $Ho_2Ge_2O_7$, 171
Glass fibres
rare-earth doped fluoride glass fibres, 27
Glycine
europium(III) complexation with glycine, 369

Halides
fluorescence spectra of ARE_2I_5 and $AREI_3$ in the solid state (A≡K, Rb, Cs, TI; RE≡Sm, Eu), 235
Holium
chiroptical activity of holmium pyrogermanate: tetragonal $Ho_2Ge_2O_7$, 171
Homogeneity
a study of the compositional homogeneity of an Nd–Fe master alloy ingot, 77
Hydration
hydration of lanthanides and actinides in solution, 325
Hydrogen
high temperature phase relationships in the Yb–H system, 265
rechargeable hydrogen batteries using rare-earth-based hydrogen storage alloys, 37
study of extraction of the $NdCl_3$–$SmCl_3$–HCl–H_2O–di-(2-ethylhexyl)-phosphoric-acid-kerosine system, 409

Iodides
luminescence of lanthanide cryptates: effects of phosphate and iodide anions, 363
Iron
a study of the compositional homogeneity of an Nd–Fe master alloy ingot, 77

Lanthanides
gadolinium chelates as relaxation agents in magnetic resonance imaging, 317
hydration of lanthanides and actinides in solution, 325
lanthanide inhibition of 5′-nucleotidase in the phosphodiesterase assay of calmodulin, 357
luminescence of lanthanide cryptates: effects of phosphate and iodide anions, 363
synthesis and characterization of lanthanide trifluoro acetate complexes with 3-picoline-*N*-oxide, 343
Lanthanum
catalytic behaviour and surface properties of supported lanthana, 295

luminescence and crystal field calculation of aragonite-type $LaBO_3:Eu^{3+}$, 223
the series $LnSrVO_4$: synthesis, crystal structure, crystal chemistry and magnetic susceptibilities, 2821
Laser methods
laser-induced fluorescence studies of terbium triscyclopentadienide, 157
Lead
structural studies in lead fluorogermanate and fluorosilicate glasses, 117
Ligands
the effect of ligand rigidity on the stability of europium(III) complexes with substituted diglycolic acids, 375
Lithium
a high-resolution spectral study of Li_3Eu(2,6-pyridinedicarboxylato)$_3$, 141
Luminescence
absorption spectra of solid rare earth complexes obtained from the inner filter effect on luminescence, 229
chiroptical activity of holmium pyrogermanate: tetragonal $Ho_2Ge_2O_7$, 171
effect of dopant concentration on optically stimulated luminescence properties of MgS, 209
laser-induced fluorescence studies of terbium triscyclopentadienide, 157
luminescence and crystal field calculation of aragonite-type $LaBO_3:Eu^{3+}$, 223
luminescence of Eu^{3+} ($4f^6$) and Am^{3+} ($5f^6$) in thorium oxide, 193
luminescence of lanthanide cryptates: effects of phosphate and iodide anions, 363
optical absorption and emission spectra of Tb^{3+} in hexagonal crystals of Na_3[Tb(pyridine-2,6-dicarboxylate)$_3$]$\cdot NaClO_4 \cdot 10H_2O$, 177
perturbations of the luminescence spectra of europium–EDTA salts caused by selected monovalent counterions, 201
rare earth(III) complexes with indole-derived acetylacetones
III: Quenching of terbium(III) luminescence in Tb–L (or A)–phenol by phenol, 403
Luminescence
rare earth(III) complexes with indole-derived acetylacetones. II. Luminescence intensity for europium(III) and terbium(III) complexes, 399.
Lutetium
^{113}Cd nuclear magnetic resonance study of the binding of Cd^{2+} and Lu^{3+} to silver hake parvalbumin, 349

Magnesium
effect of dopant concentration on optically stimulated luminescence properties of MgS, 209
Magnetic resonance
^{113}Cd nuclear magnetic resonance study of the binding of Cd^{2+} and Lu^{3+} to silver hake parvalbumin, 349
gadolinium chelates as relaxation agents in magnetic resonance imaging, 317
Matrix elements
unexpected relations between matrix elements of the three-body scalar operators t_i in the f shell, 165
Mischmetal
rechargeable hydrogen batteries using rare-earth-based hydrogen storage alloys, 37

Neodymium
a study of the compositional homogeneity of an Nd–Fe master alloy ingot, 77
comparative analyses of Nd^{3+} ($4f^3$) energy level structures in various crystalline hosts, 131
Neutron activation analysis
concentrations of rare earth elements in human brain tissue and kidney stones determined by neutron activation analysis, 63
Neutron diffraction
neutron diffraction study of $RNiC_2$ (R = Rare Earth) compounds, 251
Nickel
neutron diffraction study of $RNiC_2$ (R = Rare Earth) compounds, 251
rechargeable hydrogen batteries using rare-earth-based hydrogen storage alloys, 37
Nitrates
mean molal activity coefficients of aqueous scandium chloride, nitrate, bromide and perchlorate solutions at 25.0 °C, 383

Optical absorption
optical absorption and emission spectra of Tb^{3+} in hexagonal crystals of $Na_3[Tb(pyridine\text{-}2,6\text{-}dicarboxylate)_3]\cdot NaClO_4\cdot 10H_2O$, 177
Optical methods
effect of dopant concentration on optically stimulated luminescence properties of MgS, 209
Optical properties
optical properties and crystal field calculations of europium tellurium oxide, 111
Oxides
luminescence of Eu^{3+} ($4f^6$) and Am^{3+} ($5f^6$) in thorium oxide, 193
optical properties and crystal field calculations of europium tellurium oxide, 111
preparation and characterization of a praseodymium oxide to be used as a catalytic support, 271
synthesis and characterization of lanthanide trifluoro acetate complexes with 3-picoline-*N*-oxide, 343
Oxygen
chiroptical activity of holmium pyrogermanate: tetragonal $Ho_2Ge_2O_7$, 171
study of extraction of the $NdCl_3$–$SmCl_3$–HCl–H_2O-di-(2-ethylhexyl)-phosphoric-acid-kerosine system, 409
the series $LnSrVO_4$: synthesis, crystal structure, crystal chemistry and magnetic susceptibilities, 281

Perchlorates
mean molal activity coefficients of aqueous scandium chloride, nitrate, bromide and perchlorate solutions at 25.0 °C, 383
Phase relationships
high temperature phase relationships in the Yb–H system, 265
Phosphates
luminescence of lanthanide cryptates: effects of phosphate and iodide anions, 363
Phosphorites
recovery of rare earth elements from phosphorites in the USSR, 71
Photoexcitation methods
spectroscopy of photoexcited rare earth ions, 151
Praseodymium
first direct calculation of $4f \rightarrow 4f$ oscillator strengths for dipolar electric transitions in $PrCl_3$, 239
preparation and characterization of a praseodymium oxide to be used as a catalytic support, 271
surface electronic structure of rare earth metals, 259

Quenching
rare earth(III) complexes with indole-derived acetylacetones
III: Quenching of terbium(III) luminescence in Tb–L (or A)–phenol by phenol, 403

Samarium
fluorescence spectra of ARE_2I_5 and $AREI_3$ in the solid state (A≡K, Rb, Cs, Tl; RE≡Sm, Eu), 235
the electronic structure of organometallic complexes of the f elements
XVIII: Interpretation of the optical and magnetochemical data of a cyclohexylisocyanide adduct derived from Tris(η^5-cyclopentadienyl)samarium(III), 337
Scandium
surface electronic structure of rare earth metals, 259
Spectroscopy
determination of catalytic active sites in (Ce^{3+}, Ca^{2+})-supported Y zeolite by Fourier transform IR spectroscopy, 289
spectroscopy of photoexcited rare earth ions, 151
stereochemical dynamics and recognition probed by lanthanide chiroptical spectroscopy, 83
Strontium
the series $LnSrVO_4$: synthesis, crystal structure, crystal chemistry and magnetic susceptibilities, 281
Structure
comparative analyses of Nd^{3+} ($4f^3$) energy level structures in various crystalline hosts, 131
quark-like structures in the atomic f shell, 105
structural studies in lead fluorogermanate and fluorosilicate glasses, 117
the electronic structure of organometallic complexes of the f elements

XVIII: Interpretation of the optical and magnetochemical data of a cyclohexylisocyanide adduct derived from Tris(η^5-cyclopentadienyl samarium(III), 337
Sulphur
effect of dopant concentration on optically stimulated luminescence properties of MgS, 209
Surface metallization
study of the electrodeposition and surface metallization of yttrium, 55
Synthesis
rare earths(III) complexes with indole-derived acetylacetones. I: synthesis and characterization of rare earth(III) complexes, 391
synthesis and characterization of lanthanide trifluoro acetate complexes with 3-picoline-*N*-oxide, 343
the series $LnSrVO_4$: synthesis, crystal structure, crystal chemistry and magnetic susceptibilities, 281

Tellurium
optical properties and crystal field calculations of europium tellurium oxide, 111
Terbium
optical absorption and emission spectra of Tb^{3+} in hexagonal crystals of $Na_3[Tb(pyridine\text{-}2,6\text{-}dicarboxylate)_3]\cdot NaClO_4\cdot 10H_2O$, 177
rare earth(III) complexes with indole-derived acetylacetones. II. Luminescent intensity for europium(III) and terbium(III) complexes, 399
rare earth(III) complexes with indole-derived acetylacetones
III: Quenching of terbium(III) luminescence in Tb–L (or A)–phenol by phenol, 403
the sensitized fluorescence of polyethylene phthalate doped with 2-pyrazine carboxylic acid and its complexes with europium and terbium ions, 125
Thorium
luminescence of Eu^{3+} ($4f^6$) and Am^{3+} ($5f^6$) in thorium oxide, 193
new developments in actinide alkoxide chemistry, 303
Transition intensities
recent extensions to crystal-field and transition-intensity models, 93

Uranium
new developments in actinide alkoxide chemistry, 303

Vanadium
the series $LnSrVO_4$: synthesis, crystal structure, crystal chemistry and magnetic susceptibilities, 281

Ytterbium
determination of catalytic active sites in (Ce^{3+}, Ca^{2+})–supported Y zeolite by Fourier transform IR spectroscopy, 289
high temperature phase relationships in the Yb–H system, 265
Yttrium
study of the electrodeposition and surface metallization of yttrium, 55
surface electronic structure of rare earth metals, 259
